Exercise 3.1  Translate the following axioms into RDF Turtle syntax.

1. Person ⊑ ¬Movie
2. Mother ⊑ Woman ⊓ ∃hasChild.⊤
3. GrandParent ⊑ ∃hasChild.∃hasChild.⊤
4. PersonCommittingSuicide ⊑ ∃kills.Self
5. Fictitions ⊓ Animal ⊑⊥

Exercise 3.2  Consider the knowledge base consisting of the axioms $A ⊑ B ⊓ C$ and $C ⊑ D$. Show by using the tableaux algorithm that $A ⊑ D$ is a logical consequence of this knowledge base.

Exercise 3.3  Consider the knowledge base consisting of the two axioms Homo ⊑ Primate and ∃speaksWith.⊤ ⊑ Homo. Show by using the tableaux algorithm that ∃speaksWith.⊤ ⊑ Primate is a logical consequence of this knowledge base.

Exercise 3.4  Consider the knowledge base consisting of the three axioms Unicorn ⊑ Animal, Unicorn ⊑ Fictitious and Fictitious ⊓ Animal ⊑⊥. Show by using the tableaux algorithm that this knowledge base is satisfiable.

Exercise 3.5  Consider the knowledge base consisting of the five axioms RRated ⊑ CatMovie, CatMovie ⊑ Movie, RRated ≡ (∃hasScript.ThrillerScript) ⊔ (∀hasViolenceLevel.High), Person ⊑ ¬Movie and ∃hasViolenceLevel.⊤ ⊑ Movie.

Show by using the tableaux algorithm that Person ⊑⊥ is a logical consequence of this knowledge base.
